## KRISHNAKUMAR ORTHOPAEDIC HOSPITAL & INSTITUTE OF ORTHOPAEDICS

Accredited with the National Board of Examinations  
to train post graduates in orthopaedics

# Decades ahead of...

On the 3<sup>rd</sup> July of 1987, a small orthopaedic clinic was inaugurated in the heart of Nagercoil town. It was a small step towards a big purpose. Today, it has become one of the premier orthopaedic care centers in the south, and stands tall as a testimony to the ambition of our visionary founder, who dreamt ahead of time. Orthopaedic ailments, somehow, were kept untreated or treated as misfortune at a time, where the superior medical practices were inaccessible. But for us, that was no dead end. We brought world class orthopaedic practices to KKOH. We have successfully done total hip-replacement-surgery as early as in 1996. We have volunteered into the accident rescue service in the next year. We needed no time to integrate a new neurosurgery department with the hospital to meet the challenges in accident-related spinal and head injuries. In the dawn of the new millennium, in 2001, the inevitable SSKP charitable trust was founded to expand our reach to the poorest and downtrodden. In 2002, we got elevated into a class of ISO 9001:2000 certified hospitals (This was revised to ISO 9001:2008 in 2010). In each step forward, we were ahead of time.

The hospital is situated in the quiet environs of suburban-Nagercoil. Trivandrum International airport is just 70 kms away from the hospital. Railway station and National bus terminal are well connected to the hospital by road. KKOH is known as the best-of-the-south medical center for accident related trauma care, chronic deformities, degenerative diseases and hip-knee-elbow arthritis. Thousands of patients from different parts of the India and from outside the country reach KKOH to receive superior medical care in orthopaedics. With the best-of-India medical team, availability of advanced orthopaedic treatments are privilege to our patients.

## A keen search

## Newer practices, a new life is ahead

Orthopaedic surgeons use both surgical and non surgical means to treat musculoskeletal trauma, sports injuries, degenerative diseases, infections, tumours, and congenital disorders. Advanced treatments in orthopaedics demand active timely intervention of disciplines like emergency trauma care, surgical introduction and rehabilitation medicine. Be it a case of hairline fracture or a complicated spine injury latest treatments are available at KKOH. Advanced Ilizarov and orthofix treatments had saved many patients from amputation and permanent disability. Virtually all types of implants and artificial joints are readily available in KKOH. By imparting superior quality medical care we emerged as a hub of total orthopaedic care within a short period of time. Most of our overseas patients visit us for joint replacement, spine surgery and illizarov procedure.

Leading Blood donation initiative,  
Medical camps and Charitable activities

# Breath of a heart ahead

The first responder

Fully equipped trauma-care ambulance

Solution, wherever is valid, should extend to the whole humanity. KKSP charitable trust was founded on a vision of extending our dream of serving the down-trodden . Thriving on by donations from the public, hundreds of patients undergo expensive surgeries by the aid of the trust, irrespective of religion, caste, ethnicity or colour. To reach-out to the poor and needy, the trust organizes orthopaedic camps in rural and tribal villages every month.

When the tsunami of 2004 struck the Indian coast, KKOH and KKSP-trust were on the forefront of rescue and rehabilitation initiative. Around 100 tsunami victims were provided with free medical and surgical care at KKOH at the time of the disaster. District administration issued whole-hearted appreciation on this humanitarian effort and praises poured-in from all quarters.

Knowledge sharing is the key to success

# In search of an answer ahead Orthopaedic Institute

It is a normal course of action, if we are determined, to step into the odd. For us, it was not a challenge modernizing our medical laboratory into a full-swing research institute in 2006. We are not expecting the miracle, but the formidable. As a result of this, numerous research papers were published from the institute. The institute is currently engaged in researches to develop a substitute for natural bone. It brought much enthusiasm and approval to our institute. First batch of papers in this research await publication. The sophistication and superiority of this institute, aid our physicians excel in lectures and presentations at national and international venues.

Regular seminars and teaching sessions

As a guest surgeon at Eppendorf University, Hamburg, Germany

## International visits

From the southernmost tip of the peninsula, the name KKOH has reached far-off places like Middle-East and Europe. Foreigners and patients from different parts of the country reach KKOH to gain access of the latest techniques in orthopaedic-care. To add fuel to the never ending crave for the best, we bring surgeons and experts from all over the world to KKOH, to widen our knowledge and infrastructure. "Because our race for excellence never ends"

Dr.Nicola from Germany as trainee in orthopaedics department at KKOH

As faculty at Bangkok

With Prof. Ronald.J.Sabitzer at Vienna
